

New for 2009 from:

TRYST Co models

from

HUNTERS TRYST COACHWORKS

A range of 4mm scale resin bus kits, covering fleets and vehicles in the Southern part of England, including London Transport.

The kits will be in the popular cream resin, with whitemetal base plates, steering wheel etc., and push fit rubber wheels. The exception to this will be Kit CK1, which is a special conversion kit for the diecast Leyland Olympian to make a dual door London specification vehicle.

The Hunters Tryst Graphics range of waterslide transfers will be extended to cover destination blinds, registration numbers etc., dedicated to the kits being issued, and the kits will also include instructions where remaining transfers can be obtained to complete the kits.

The initial range will include:

Kit CK1 - A conversion kit for the EFE Leyland Olympian, comprising a new lower deck casting and seat unit, which will require a donor model to complete.

Kit S1 - 1953 East Lancs Leyland Royal Tiger Southdown B40R, LUF 500 -509.

Kit LC1 - AEC Swift/Alexander W type - Green Line SMA class.

Kit EK1 - AEC Swift/Alexander W type - East Kent.

Kit EK2A - 1967 Bedford VAS1/ Marshall Cambrette - East Kent.

It is hoped to release the kits in the order shown above, but this is not guaranteed.

Any of the above kits can be pre-ordered, without obligation, and you will be notified when the kits are in production, and ready for dispatch.
